

**HÄRTER**  
TEIL DES ERFOLGS

## E-SOLUTIONS

For mobility. For electronics. For industry. Härter develops andrealises technologically SOPHISTICATED METAL AND plastic components in close cooperation with our customers. Discover the safety, functionality and reliability of HÄRTER components for e-solutions. Everything from shielding to cell connection.

**Busbars**

**Battery fuses**

**Press-fit  
contact systems**

**Metallic housings**

**HV contact systems**

**HV shielding**

**HV battery  
connectors**

# E-SOLUTIONS APPLICATIONS

Individually designed and constructed – and manufactured with maximum added value: our e-solutions for mobility, electronics and industry.

## **HV shielding**

Complex 3D housings for safe and reliable shielding of HV connectors.

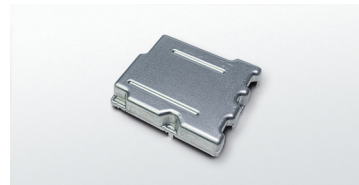

## **HV battery connectors**

Hybrid assemblies made of different metal and plastic materials – assembled, overmoulded.

## **Press-fit contact systems**

For safe, pluggable contacting on the PCB – without soldering. For permanently secure connections.

## **Metallic housings**

The right housing made by Härter ensures stability, heat dissipation and shielding.

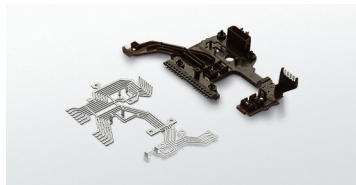

## **HV contact systems**

High-performance terminals for touch-safe high-voltage connection systems:

## **Battery fuses**

Punched conductor tracks with integrated fuse, also equipped with pins and bushes in a plastic housing.

## **Busbars**

Punched, curved conductive tracks, overmoulded with plastic for individual contacting solutions.
